Bay St. Louis, MS 39521

**March 19, 2014**

Gulf Hills Hotel & Convention Center  
13701 Paso Road  
Ocean Springs, MS 39564

MISSISSIPPI STATE DEPARTMENT OF HEALTH

This training is funded through an Assistant Secretary for Preparedness and Response (ASPR) grant to the Mississippi State Department of Health (MSDH) in collaboration with the Mississippi Hospital Association—Health, Education, and Research Foundation.

## Goals of Triage Tuesday Training

To have EMS Transport Services and hospitals periodically (on given Tuesdays) use triage tags in conjunction with their START, Jump START and other triaging skills so that there is enhanced competency and capability of both EMS and hospitals in managing trauma victims during a real time incident.

To train trainers and emergency response personnel to a competent standard in skills required for planning and responding to the multiple casualty scenario.

To develop an awareness and structure required for successful response to the multiple casualty Incident (MCI) specific to the local operating requirements.

It is encouraged that both the hospital and EMS Agencies leadership promote participation in “Triage Tuesday” training throughout their emergency and EMS/ EMT departments.

The class will be broken down in to four sessions.

- Identifying and tackling an MCI.
- The Why, When, and How of Triage.
- Exercise where delegates put into practice their triage skills.
- Local application of scene management discussion.

The Class is typically a 60% lecture and 40% exercise and discussion. At the end of the class students should be able to:

1. State the aim of their response to an MCI;
2. State when how and why triage is carried out;
3. Be able to complete a Primary triage exercise;
4. Be able to complete a Secondary triage exercise;
5. Where appropriate, delegates will be able to teach the class to their peers with suitable support materials; and
6. Be competent in the use of the Smart Incident Command System.
